(ii). Employment of disabled persons

The Company adopts a non-discriminatory policy of giving fair consideration to applications for employment including those received from disabled persons having regard to their particular aptitudes and abilities.

(iii). Employee Health Safety and Welfare

The Company maintains business premises designed with a view to guaranteeing the safety and healthy living conditions of its employees and customers alike. Employees are adequately insured against occupational and other hazards. In addition, free medical services are provided for the Company's employees through Health Management Organisations (HMO). Fire prevention and fire-fighting equipment are installed in strategic locations within the Company's premises. The Company also operates a contributory pension plan in line with the Pension Reform Act 2014.

Welfare facilities provided include: housing for employees (or payment of allowance in lieu), transport allowance; car loans or official cars. Incentive schemes designed to meet the circumstances of each individual are implemented wherever appropriate and some of these include promotions, salaries and wages review amongst others.

AUDITOR

The Auditor, Messrs. Ernst & Young indicated their willingness to continue in office as auditors in accordance with Section 401(1) of the Companies and Allied Matters Act, 2020.

COMPLIANCE WITH CODE OF CORPORATE GOVERNANCE

In view of its commitment to the implementation of effective corporate governance principles in its business operations, the Company filed its periodic returns with the National Insurance Commission (NAICOM) and Corporate Affairs Commission as required by regulation.

Also, in line with the principles of Corporate Governance the Company made efforts to satisfy the requirement of convening a Board Meeting every quarter. The established Board Committees are equally viable and are working in line with their Terms of Reference.

By order of the Board

CORPORATE GOVERNANCE REPORT

FOR THE YEAR ENDED 31 DECEMBER 2021

Mutual Benefits Life Assurance Limited remains committed to the principles and practices that promote good Corporate Governance. We recognize that sound corporate governance practices are necessary for effective management and control of the Company's business. The Company adopts a responsible attitude towards Corporate Governance and issues of Corporate Social Responsibility. The Company conducts its business with integrity and pays due regard to the legitimate interest of its stakeholders.

The Company continues to comply with its Internal Governance Policies, the National Code of Good Corporate Governance 2018, issued by the Financial Reporting and the sectoral Guidance issued by the National Insurance Commission (NAICOM). The National Code covers a wide range of issues including Board structure, Quality of Board Members, duties of the Board, conduct of the Board of Directors, Rights of Shareholders and Committees of the Board.

THE BOARD OF DIRECTORS

The Board of Directors has the ultimate responsibility for the overall functioning of the Company. The responsibilities of the Board include setting the Company's strategic objectives and policies, providing leadership to put them into effect, supervising the management of the business, ensuring implementation of decisions reached at the Annual General Meeting, ensuring value creation to shareholders and employees, determination of the terms of reference and procedures of all Board Committees, ensuring maintenance of ethical standard as well as compliance with the laws of Nigeria. The Board consists of five (5) Directors, made up of one (1) Executive Director and four (4) Non-Executive Directors, one of whom is the Chairman. The Directors are experienced stakeholders with diverse professional backgrounds in Insurance, Accounting, Commerce, Management, Engineering, Government etc. The Directors are people of impeccable character and high integrity.

The Company is indeed delighted to have a versatile Board with deep understanding of its responsibilities to Shareholders, Regulatory Authorities, Government and other Stakeholders. The Board always takes proactive steps to master and fully appreciate all cultural, legislative, ethical, institutional and all other factors, which impact our operations and operating environment. This has ensured that a culture of compiliance with rules and regulation is entrenched at all levels of operations within the Company.

The meetings of the Board are scheduled well in advance and reports from Committees of the Board are circulated to all the Directors. The Board meets quarterly.

(a) RECORD OF DIRECTORS' ATTENDANCE

In accordance with Section 318(3) of the Companies and Allied Matters Act, 2020, the record of Director's attendance and meetings held during year 2021 is available for inspection at the Annual General Meeting. The meetings of the Board were presided over by the Chairman and the Board met three (3) times during the year as detailed in the table below. Written notices of the Board meetings, along with the agenda circulated at least fourteen days before the meetings. The minutes of the meetings were appropriately recorded and circulated.

CORPORATE GOVERNANCE REPORT - Continued

FOR THE YEAR ENDED 31 DECEMBER 2021

(C) Enterprise Risk Management

i. Introduction and Overview

Mutual Benefits Life Assurance Limited has a clear and functional Enterprise Risk Management (ERM) framework that is responsible for identifying, assessing and managing the likely impact of risk faced by the Company.

ii. Enterprise-wide Risk Management Principles

At Mutual Benefits Life Assurance Limited, we try as much as possible to balance our portfolio of risks while maximizing value to stakeholders through an approach that mitigates the inherent risks and reward our business.

To ensure effective and economic development of resources, we operate strictly by the following principles:

- · The Company will not take any action that will compromise its integrity
- · The Company will at all times comply with all government regulations and uphold best international practice.
- · The Company will build an enduring risk culture, which shall pervade the entire organisation.
- The Company will at all times hold a balanced portfolio and adhere to guidelines on investment issued by regulator and the Finance Investment and Strategy Committee of the Board.
- The Company will ensure that there is adequate reinsurance in place for its businesses and the also ensure prompt payment of such premiums.

iii. Approach to Risk Management

At Mutual Benefits Life Assurance Limited, there are levels of authority put in place for the oversight function and management of risk to create and promote a culture that mitigates the negative impact of risks facing the Company.

iv. The Board

The Board sets the organisation's objectives, risk appetite and approves the strategy for managing risk. There is a Board Committee on Audit & Risk Management which ensures that various functions are geared towards minimizing the likelihood of the impacts of risks faced by the Company.

v. Audit & Risk Management Committee

This Committee oversees the business process. Their functions

- · Reviewing the Company's risk appetite
- · Oversee management's process for identification of significant risk across the Company and the adequacy of prevention detection and reporting mechanisms
- · Review underwriting risks especially risks above management's limit for adequacy of reinsurance and Company's participation.
- · Review and recommend for approval of the Board, risk management procedures and controls for new products and services.

(C) Enterprise Risk Management

vi. Finance, Investment & Strategy Committee

Sets the investment limit and the type of businesses the Company should invest in.

- · Reviews and approves the Company's Investment policy.
- · Approves investments over and above Management's approval limit.
- Ensures that there is optimal asset allocation in order to meet the targeted goals of the Company.

The second level is the management of the Company. This comprises the Managing Director and the Management Committee.

They are responsible for strategic implementation of the Enterprise Risk Management policies and guidelines set by the Regulator, Government and the Board for risk mitigation. This is achieved through the business unit they supervise.

The third line of defence is that of the independent assurance. This comprises the internal audit function that provides independent and objective assurance of the effectiveness of the Company's system of internal control established by the first and second lines of defence in management of Enterprise Risk across the organisation.

REPORT OF THE AUDIT & RISK MANAGEMENT COMMITTEE

FOR THE YEAR ENDED 31 DECEMBER 2021

To the members of Mutual Benefits Life Assurance Limited

In accordance with the relevant provisions of the Companies and Allied Matters Act, 2020, the Insurance Act 2003, the relevant policy guidelines issued by the National Insurance Commission (NAICOM) and the Financial Reporting Council of Nigeria Act No. 6, 2011, the members of the Audit & Risk Management Committee of Mutual Benefits Life Assurance Limited hereby report as follows:

- We have exercised our statutory functions under section 404(7) of the Companies and Allied Matters Act, 2020 and we acknowledge that the scope and planning of both the external and internal audits for the year ended 31 December 2021 were satisfactory and reinforce the Company's Internal Control Systems.
- We confirm that the accounting and reporting policies of the Group are in accordance with legal requirements and agreed ethical practices.
- We are satisfied with the Management's responses to the external auditor's recommendations on accounting and internal control matters and with the effectiveness of the Company's system of accounting and Internal Control.
- · We acknowledge the co-operation of Management and staff in the conduct of statutory responsibilities.

STATEMENT OF CORPORATE RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2021

In line with the provision of Section 405 of Companies and Allied Matter Act 2020, we have reviewed the audited financial statements of the Group and the Company for the year ended 31 December 2021 based on our knowledge confirm as follows:

- i The audited financial statements do not contain any untrue statement of material fact or omit to state a material fact which would make the statements misleading.
- The audited financial statements and all other financial information included in the statements fairly present, in all material respects, the financial condition and results of operation of the Group and the Company as of and for the year ended 31 December 2021.
- iii The Company's internal controls for the year 2021 have been designed to ensure that all material information relating to the Company and its subsidiaries is received and provided to the Auditors in the course of the audit.
- iv The Company's and subsidiary internal controls were evaluated within 90 days of the financial reporting date and are effective as of 31 December 2021.

That we have disclosed to the Company's Auditor and Audit Committee the following information:

- a there are no significant deficiencies in the design or operation of the group internal controls which could adversely affect the bank's ability to record, process, summarise and report financial data, and have discussed with the auditor any weaknesses in internal controls observed in the cause of Audit.
- b there is no fraud involving management or other employees which could have any significant role in the group internal control.
- v There are no significant changes in internal controls or in the other factors that could significantly affect internal controls subsequent to the date of this audit, including any corrective actions with regard to any observed deficiencies and material weaknesses.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2021

The directors accept responsibility for the preparation of the annual financial statements that give a true and fair view of the statement of financial position of the Group and the Company at the end of the year and of its profit or loss and other comprehensive income as required by the Companies and Allied Matters Act, 2020 and the Insurance Act. 2003. The responsibilities include ensuring that the Company:

- a) keeps proper accounting records that disclose, with reasonable accuracy, the financial position of the Group and the Company and comply with the requirements of the Companies and Allied Matters Act and the Insurance Act;
- b) establishes adequate internal controls to safeguard its assets and to prevent and detect fraud and other irregularities; and
- c) prepares its financial statements using suitable accounting policies supported by reasonable and prudent judgments and estimates, which are all consistently applied.

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates, in conformity with

- International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board;
- the requirement of the Insurance Act 2003,
- relevant guidelines and circulars issued by the National Insurance Commission (NAICOM)
- the requirements of the Companies and Allied Matters Act, 2020; and
- the Financial Reporting Council of Nigeria Act No 6, 2011.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of financial statements, as well as adequate systems of internal financial control.

Nothing has come to the attention of the Directors to indicate that the Group and the Company will not remain a going concern for at least twelve months from the date of this statement.

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of Mutual Benefits Life Assurance Limited ("the Company") and its subsidiaries (together 'the Group'), which comprise the consolidated and separate statements of financial position as at 31 December 2021, and the consolidated and separate statements of profit or loss, the consolidated and separate statements of other comprehensive income, the consolidated and separate statements of cash flows for the year then ended, and a summary of significant accounting policies and notes to the consolidated and separate financial statements.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Group and the Company as at 31 December 2021, and its consolidated and separate financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards and the relevant provisions of the Companies and Allied Matters Act, 2020, the Insurance Act 2003 and relevant policy guidelines issued by the National Insurance Commission (NAICOM) and the Financial Reporting Council of Nigeria Act No. 6, 2011.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements* section of our report. We are independent of the Group and the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matter

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated and separate financial statements of the current year. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated and separate financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying consolidated and separate financial statements.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MUTUAL BENEFITS LIFE ASSURANCE LIMITED - Continued

Key Audit Matters- continued

The Key Audit Matters applies equally to the audit of the consolidated and separate financial statements

Key Audit Matter

Adequacy of valuation of Insurance Contract Liabilities

This is an area that involves significant judgement over uncertain future outcomes and therefore we considered it a key audit matter for our audit.

The Group has insurance contract liabilities of №13.51 billion (Dec 2020: №10.14 billion), out of which included outstanding claims of №9.59 billion (Dec 2020: №7.99 billion) as at 31 December 2021 representing 20% (Dec 2020: 18%) of the Group's total liabilities.

The Group engaged an independent actuary to ensure the adequacy of the estimated outstanding claims and unearned premium which comprised the insurance contract liabilities by performing an actuarial valuation at year-end. The complexity of the valuation models may give rise to errors as a result of inadequate/incomplete data or the design or application of the models. Economic assumptions such as interest rates and future inflation rates and actuarial assumptions such as customer behavior and uniform risk occurrence throughout the year are key inputs used to determine these liabilities. Significant judgement is applied in setting these assumptions.

Insurance contract liabilities are disclosed in Note 32 to the consolidated and separate financial statements.

How the matter was addressed in the audit

- We reviewed and documented management's process for estimating life policy benefits.
- We assessed the design of internal controls over the integrity of underwriting and claims data in the system as well as over the reserving and claims processes.
- We performed file reviews of specific underwriting contracts in order to maximize our understanding of the book of business and validate initial loss estimates.
- We tested subsequent year claim payments to confirm the reasonableness of the initial loss estimates.

With the assistance of our in-house actuarial specialists, we performed the following audit procedures on the Company's actuarial reports:

- We considered the appropriateness of the economic assumptions used in the valuation of the insurance contracts with reference to the Company's and industry's data and expectations of investment returns, and expense developments.
- We considered the appropriateness of the noneconomic assumptions used in the valuation of the insurance contracts by reference to Company-specific and industry data.
- We assessed the competence and objectivity of the Company's independent actuary, confirming they are qualified and affiliated with the appropriate industry bodies.

Other Information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Mutual Benefits Life Assurance Limited's Annual Report and Annual Consolidated and Separate Financial Statements for the year ended 31 December 2021", which includes the Corporate Information, the Financial Highlights, the Report of the Directors, the Corporate Governance Report, Report of the Statutory Audit Committee, Statement of Corporate Responsibility, Statement of Directors' responsibilities and Other National Disclosures as required by the Companies and Allied Matters Act, 2020 and Financial Reporting Council of Nigeria Act No. 6, 2011 and the Corporate Governance Report as required by NAICOM, which we obtained prior to the date of this report. The other information does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors' for the Financial Statements

The Directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards (IFRS), and the relevant provisions of the Companies and Allied Matters Act, 2020, the Insurance Act 2003, relevant policy guidelines issued by the National Insurance Commission (NAICOM), and the Financial Reporting Council of Nigeria Act No. 6, 2011 and for such internal control as the Directors determines necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group and/or the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MUTUAL BENEFITS LIFE ASSURANCE LIMITED - Continued

Auditor's Responsibilities for the Audit of the Financial Statements - Continued

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Group and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and
 based on the audit evidence obtained, whether a material uncertainty exists related to events or
 conditions that may cast significant doubt on the Group's and the Company's ability to continue as a
 going concern. If we conclude that a material uncertainty exists, we are required to draw attention in
 our auditor's report to the related disclosures in the consolidated and separate financial statements
 or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit
 evidence obtained up to the date of our auditor's report. However, future events or conditions may
 cause the Group and/or the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
 We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MUTUAL BENEFITS LIFE ASSURANCE LIMITED - Continued

Auditor's Responsibilities for the Audit of the Financial Statements - Continued

From the matters communicated with the Directors, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

In accordance with the requirements of Fifth schedule of the Companies and Allied Matters Act, 2020 and Section 28(2) of the Insurance Act 2003, we confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- ii) in our opinion, proper books of account have been kept by the Group and Company, in so far as it appears from our examination of those books;
- iii) the consolidated and separate statements of financial position and the consolidated and separate statements of profit or loss and the consolidated and separate statement of other comprehensive income are in agreement with the books of account; and
- iv) in our opinion, the consolidated and separate financial statements have been prepared in accordance with the provisions the Companies and Allied Matters Act, 2020 and of Section 28(2) of the Insurance Act 2003, so as to give a true and fair view of the state of affairs and financial performance of the Company and its subsidiaries.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. Corporate information

Mutual Benefits Life Assurance Limited ("the Company") (RC 681998) was incorporated as a private limited liability company on 20 February 2007, granted the Certificate of Registration as an insurer by the National Insurance Commission (NAICOM) on 14 November 2007 and commenced operation immediately.

The Company is a financial and wealth protection company in Nigeria. The principal objective of the Company is to render qualitative life related insurance & risks management services. It is a premium provider of life insurance, annuity and investment products and services. The address of the registered office is: Aret Adams House, 233 Ikorodu Road, Ilupeju, Lagos.

The Company pays claims arising from insurance contract liabilities and investments policy holders' funds in line with the provision of Insurance Act, CAP 117, Law of the Federal Republic of Nigeria 2014 and NAICOM prudential guidelines.

The principal activities of the subsidiaries and information of the Group's structure are disclosed in Note 27. Information on other related party relationships of the Group is provided in Note 48.

The consolidated and separate financial statements of the Company and its subsidiaries were authorised for issue by the Board of Directors on 29 April 2022.

Going Concern

The consolidated and separate financial statements have been prepared on the going concern basis and there is no intention to curtail business operations. Capital adequacy and liquidity ratios are continuously reviewed and appropriate action taken to ensure that there are no going concern threats to the operation of the Group.

The Directors have made assessment of the Group's and the Company's ability to continue as a going concern and have no reason to believe that the Group and the Company will not remain a going concern in the years ahead.

2. Summary of significant accounting policies

2.1 Introduction to summary of accounting policies

The principal accounting policies applied in the preparation of these consolidated and separate financial statements ("the financial statements") are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

2.2 Basis of preparation

Statement of compliance with IFRS

These consolidated and separate financial statements of the Company and its subsidiaries have been prepared in accordance with the International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). Additional information required by national regulations has been included where appropriate.

The consolidated and separate financial statements comprise of the statements of profit or loss, statements of other comprehensive income, the statements of financial position, the statements of changes in equity, the statements of cash flows, summary of significant accounting policies and the notes.

The consolidated and separate financial statements values are presented in Nigerian Naira (₦) rounded to the nearest thousand (₦'000), unless otherwise indicated.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Statement of compliance with IFRS - Continued

The Group presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the reporting date (no more than 12 months) and more than 12 months after the reporting date (more than 12 months) is presented in the respective notes.

(a) Basis of measurement

These consolidated and separate financial statements have been prepared on the historical cost basis except for investment properties and financial assets are measured at FVPL and FVOCI.

(b) Use of estimates and judgements

The preparation of the financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

Information about significant areas of estimation uncertainties and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in Note 2.3.37.

2.3. Significant accounting policies

Except for the effect of the changes in accounting policies as disclosed in Note 2.3.36.1, if any, the group has consistently applied the following accounting policies to all periods presented in these financial statements

2.3.1 Basis of Consolidation

The consolidated and separate financial statements comprise the financial statements of the Group and its investees that are considered subsidiaries as at 31 December 2021. Subsidiaries are investees that the Group has control over. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- (a) Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- (b) Exposure, or rights, to variable returns from its involvement with the investee; and
- (c) The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) The contractual arrangement with the other vote holders of the investee
- (b) Rights arising from other contractual arrangements
- (c) The Group's voting rights and potential voting rights

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.1 Basis of Consolidation - Continued

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of OCI are attributed to the owners of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction (transactions with owners).

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, noncontrolling interest and other components of equity, while any resultant gain or loss is recognised in profit or loss. Any investment retained is recognised at fair value.

2.3.2 Product classification

Insurance contracts are those contracts where the Group (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Group determines whether it has significant insurance risk, by comparing benefits payable after an insured event with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

Investment contracts are those contracts that transfer significant financial risk, but not significant insurance risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of price or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or expire. Investment contracts can, however, be reclassified as insurance contracts after inception if insurance risk becomes significant.

2.3.3 Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, which is measured at acquisition date fair value, and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in administrative expenses.

When the Group acquires a business, it assesses the financial assets acquired and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.3 Business combinations and goodwill - Continued

Any contingent consideration to be transferred by the acquirer will be recognised at fair value at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of IFRS 9 Financial Instruments, is measured at fair value with the changes in fair value recognised in the statement of profit or loss in accordance with IFRS 9. Other contingent consideration that is not within the scope of IFRS 9 is measured at fair value at each reporting date with changes in fair value recognised in profit or loss.

Goodwill is initially measured at cost (being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held over the net identifiable assets acquired and liabilities assumed). If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in profit or loss.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

Where goodwill has been allocated to a cash-generating unit (CGU) and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

2.3.4 Foreign currency translation

The Group's consolidated financial statements are presented in Naira which is also the parent company's functional currency. Each company in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The Group uses the direct method of consolidation and on disposal of a foreign operation, the gain or loss that is reclassified to profit or loss reflects the amount that arises from using this method.

2.3.4.1 Transactions and balances

Transactions in foreign currencies are initially recorded by the Group's entities at their functional currency spot rate prevailing at the date the transaction first qualifies for recognition. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rate of exchange at the reporting date.

All differences arising on settlement or translation of monetary items are taken to the statement of profit or loss with the exception of differences on foreign monetary items that form part of a net investment in a foreign operation. These are recognised in OCI until the disposal of the net investment, at which time they are reclassified to profit or loss. Tax charges and credits attributable to exchange differences on these monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of a gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognised in OCI or profit or loss are also recognised in OCI or profit or loss, respectively).

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.4.2 Group companies

On consolidation, the assets and liabilities of foreign operations are translated into Naira at the rate of exchange prevailing at the reporting date and their statement of profit or loss is translated at exchange rates prevailing at the date of the transactions. The exchange differences arising on the translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is reclassified to profit or loss.

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the rate of exchange at the reporting date.

2.3.5 Segment reporting

For management purposes, the Group is organised into business units based on their products and services and has three reportable operating segments; assurance business, real estate and microfinance bank.

A segment is a distinguishable component of the Group that is engaged in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments. The Group's primary format for segment reporting is based on business segments i.e life business, real estate and microfinance. Significant geographical regions have been identified as the secondary basis of reporting, which are Nigeria, Niger and Liberia as disclosed Note 3.6.

Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements.

2.3.6 Revenue recognition

Revenue comprises premium, fee & Commissions, investment income, finance income, value for services rendered, net of value-added tax, after eliminating revenue within the Group.

2.3.6.1 Gross premiums

Gross recurring premiums on life and investment contracts are recognised as revenue when payable by the policyholder. For single premium business, revenue is recognised on the date on which the policy is effective.

Gross general insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the accounting period. They are recognised on the date on which the policy commences. Gross premium income includes any adjustments arising in the accounting period for premiums receivable in respect of business written in prior accounting periods. Premiums collected by intermediaries, but not yet received, are assessed based on estimates from underwriting or past experience and are included in premiums written.

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a daily pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

2.3.6.2 Reinsurance premiums

Gross outward reinsurance premiums on life are recognised as an expense on the earlier of the date when premiums are payable or when the policy becomes effective.

Gross general reinsurance premiums ceded comprise the total premiums payable for the whole cover provided by contracts entered into in the period and are recognised on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.6.2 Reinsurance premiums

Unearned reinsurance premiums are those proportions of premiums ceded in a year that relate to periods of risk after the reporting date. Unearned reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses-occurring contracts.

Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net benefits and claims, respectively, because this is consistent with how the business is managed.

Reinsurance commission income

Reinsurance commission income represents commission received on direct business and transactions ceded to re-insurance during the year. It is recognized over the cover provided by contracts entered into the period and are recognized on the date on which the policy incepts.

2.3.6.3 Fees and commission income

Fee income represents commission received on direct business and transactions ceded to re-insurance companies during the year under review.

2.3.6.4 Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established and Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease terms

2.3.6.5 Rendering of services and sales of goods

Revenue from sales of goods arising from property business engaged in by the Group. The revenue recognition is contingent on when control is transferred to buyer.

2.3.6.6 Finance income

Interest income arising from the micro finance banking services offered by the Group and is recognized in the profit or loss as it accrues and is calculated by using the effective interest rate method.

2.3.7 Benefits, claims and expenses recognition

2.3.7.1 Gross benefits and claims

Gross benefits and claims for life insurance contracts include the cost of all claims arising during the year, including internal and external claims handling costs that are directly related to the processing and settlement of claims. Death claims and surrenders are recorded on the basis of notifications received.

General insurance claims include all claims occurring during the year, whether reported or not, related internal and external claims handling costs that are directly related to the processing and settlement of claims, a reduction for the value of salvage and other recoveries, and any adjustments to claims outstanding from previous years.

2.3.7.2 Reinsurance claims

Reinsurance claims are recognized when the related gross insurance claim is recognized according to the terms of the relevant contract.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.7 Benefits, claims and expenses recognition - Continued

2.3.7.3 Underwriting expenses

Underwriting expenses comprise acquisitions costs and other underwriting expenses. Acquisition costs comprise all direct and indirect costs arising from the writing of insurance contracts. These costs also include fees and commission expense. Other underwriting expenses are those incurred in servicing existing policies and contracts. Acquisition costs are recognized in the statement of profit or loss over the tenor of the insurance cover.

2.3.7.4 General administrative expenses

These are expenses other than claims and underwriting expenses. They include employee benefits, professional fees, depreciation expenses and other non-operating expenses. Management expenses are accounted for on accrual basis and recognized in the statement of profit or loss upon utilization of the service or at the date of origination.

2.3.7.5 Finance costs

Interest expense arising from the micro finance banking services offered by the Group is recognized in the profit or loss as it accrues and is calculated by using the effective interest rate method. Accrued interest is included within the carrying value of the interest-bearing financial liability.

2.3.8 Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash at banks and on hand and short-term deposits with a maturity of three months or less from origination, which are subject to an insignificant risk of changes in value and not subject to any encumbrances.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts, if any, as they are considered an integral part of the Group's cash management.

2.3.9 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

2.3.9.1 Financial assets

2.3.9.1.1 Initial recognition

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.9 Financial Instruments - Continued

measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows while financial assets classified and measured at fair value through OCI are held within a business model with the objective of both holding to collect contractual cash flows and selling.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

2.3.9.1.2 Financial assets subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses Upon derecognition (equity instruments)
- · Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes short-terms deposits with banks, Loans and advances, and other Debt instruments at amortised cost if both of the following conditions are met

- The instruments are held within a business model with the objective of holding the instrument to collect the contractual cash flows
- The contractual terms of the debt instrument give rise on specified dates to cash flows that are solely
 payments of principal and interest (SPPI) on the principal amount outstanding

Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under IAS 32 *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

The Group elected to classify irrevocably its non-listed equity investments under this category.

Financial assets at fair value through profit or loss

Financial assets in this category are those that are managed in a fair value business model, or that have been designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. This category includes debt instruments whose cash flow characteristics fail the SPPI criterion or are not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Financial assets subsequent measurement - Continued

This category includes listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are recognised as investment income in the statement of profit or loss when the right of payment has been established.

2.3.9.1.3 Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired Or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

2.3.9.1.4 Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables, the Group applies a regulatory no premium no covers impairment approach.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.9.1.5 The calculation of ECLs

The Group calculates ECLs based on scenarios to measure the expected cash shortfalls, discounted at an appropriate EIR. A cash shortfall is the difference between the cash flows that are due to the Group in accordance with the contract and the cash flows that the entity expects to receive.

When estimating the ECLs the Group considers three scenarios (a base case, an upside, and a downside). When relevant, the assessment of multiple scenarios also incorporates the probability that the defaulted loans will cure.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

PD - The Probability of Default is an estimate of the likelihood of default over a given time horizon. It is estimated with consideration of economic scenarios and forward-looking information.

EAD - The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, and accrued interest from missed payments.

LGD - The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the Company would expect to receive. It is usually expressed as a percentage of the EAD.

The Group allocates its assets subject to ELC calculations into one of these categories, determined as follows:

Stage 1 (12mECL): The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within 12 months after the reporting date. The Company calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an appropriate EIR. This calculation is made for each of the three scenarios, as explained above.

2.3.9.1.5 The calculation of ECLs

Stage 2 (LTECL): When an instrument has shown a significant increase in credit risk since origination, the Company records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected losses are discounted by an appropriate EIR.

Stage 3/Impairment (LTECL): For debt instruments considered credit-impaired, the Company recognises the lifetime expected credit losses for these instruments. The method is similar to that for Stage 2 assets, with the PD set at 100%.

2.3.9.1.6 Write-offs

Financial assets are written off either partially or in their entirety only when the Group has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense. There were no write-offs over the periods reported in these financial statements

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.9.2 Financial liabilities

2.3.9.2.1 Initial recognition and measurement

Financial liabilities are classified at initial recognition, as borrowing, payables and other payables as appropriate.

All financial liabilities are recognized initially at fair value, except in the case of financial liabilities recorded at FVPL, transaction costs are subtracted from, this amount. The Group's financial liabilities include trade payables, other accrual and payables.

2.3.9.2.2 Subsequent measurement

Subsequent measurement of financial liabilities depends on their classification.

i. Payables and other payables

Subsequent to initial recognition, they are measured at amortized cost using the effective interest rate method. If the due date of the liability is less than one-year discounting is omitted.

ii. Interest bearing loans and borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fee or costs that are an integral part of the EIR. The EIR amortisation is included in finance cost in the statement of profit or loss.

2.3.9.2.3 Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the profit or loss.

2.3.9.3 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

2.3.10 Deposit liabilities

Deposits liabilities include current, term and savings deposits with the Group by depositors. Deposits from customers are initially recognized in liabilities at fair value less transaction cost and subsequently measured at amortised cost.

Interest paid on the deposits is expensed as finance cost in profit or loss' during the period in which the Group has the obligation to pay the interest. Deposits are derecognised when repaid to customers on demand or used to offset amount(s) due from the customer as agreed in the contract.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.11 Fair value measurement

The Group measures financial instruments and non-financial assets such as investment properties at fair value at each reporting date. Also, fair values of financial instruments measured at amortised cost are disclosed in Note 3.5.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each year.

The Group's management determines the policies and procedures for both recurring fair value measurement, such as investment properties and unquoted equity instruments, and for non-recurring measurement, such as assets held for distribution in discontinued operation.

External valuers are involved for valuation of significant assets, such as investment properties. Involvement of external valuers is decided upon annually by the management after discussion with and approval by the audit committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. The management, in conjunction with the Group's external valuers, also compares the changes in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.11 Fair value measurement - continued

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

The fair value of financial instruments that are actively traded in organised financial markets is determined by reference to quoted market bid prices for assets and offer prices for liabilities, at the close of business on the reporting date, without any deduction for transaction costs.

For units in unit trusts and shares in open ended investment companies, fair value is determined by reference to published bid values in an active market.

For other financial instruments not traded in an active market, the fair value is determined by using appropriate valuation techniques. Valuation techniques include the discounted cash flow method, comparison to similar instruments for which market observable prices exist and other relevant valuation models.

Their fair value is determined using a valuation model that has been tested against prices or inputs to actual market transactions and using the Group's best estimate of the most appropriate model assumptions.

For discounted cash flow techniques, estimated future cash flows are based on management's best estimates and the discount rate used is a market-related rate for a similar instrument. The use of different pricing models and assumptions could produce materially different estimates of fair values.

The fair value of floating rate and overnight deposits with credit institutions is their carrying value. The carrying value is the cost of the deposit and accrued interest. The fair value of fixed interest-bearing deposits is estimated using discounted cash flow techniques. Expected cash flows are discounted at current market rates for similar instruments at the reporting date.

2.3.12 Impairment of non-financial assets

The Group assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Group of assets.

2.3.12 Impairment of non-financial assets

Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

Impairment losses of continuing operations are recognized in the profit or loss in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Group makes an estimate of the asset's or CGU's recoverable amount.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.12 Impairment of non-financial assets

A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the profit or loss unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase.

The following criteria are also applied in assessing impairment of goodwill:

Intangible assets

Intangible assets with indefinite useful lives are tested for impairment annually at 31 December, either individually or at the cash generating unit level, as appropriate and when circumstances indicate that the carrying value may be impaired.

2.3.13 Pledged assets

Financial assets transferred to external parties that do not qualify for de-recognition are reclassified in the statement of financial position from financial assets to pledged assets, if the transferee has received the right to sell or re-pledge them in the event of default from agreed terms.

Initial recognition of pledged assets is at fair value, whilst subsequent measurement is based on the classification and measurement of the financial asset in accordance with IFRS 9.

2.3.14 Trade receivables

Trade receivables (premium receivable) are initially recognized at fair value and subsequently measured at amortized cost less provision for impairment. Discounting is omitted where the effect of discounting is immaterial.

An allowance for impairment is made when there is objective evidence such as the probability of solvency or significant financial difficulties of the debtors that the Group will not be able to collect the amount due under the original terms of the invoice. Impaired debts are derecognized when they are assessed as uncollectible.

If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previous recognized impairment loss is reversed to the extent that the carrying value of the asset does not exceed its amortised cost at the reversed date. Any subsequent reversal of an impairment loss is recognized in the profit or loss.

2.3.15 Reinsurance

2.3.15.1 Reinsurance ceded to reinsurance counterparties

The Group cedes insurance risk in the normal course of business for most of its businesses. Reinsurance assets represent balances due from reinsurance companies. Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision or settled claims associated with the reinsurer's policies and are in accordance with the related reinsurance contract.

Reinsurance assets are reviewed for impairment at each reporting date, or more frequently, when an indication of impairment arises during the reporting year. Impairment occurs when there is objective evidence as a result of an event that occurred after initial recognition of the reinsurance asset that the Group may not receive all outstanding amounts due under the terms of the contract and the event has a reliably measurable impact on the amounts that the Group will receive from the reinsurer. The impairment loss is recorded in the statement of profit or loss.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Reinsurance - Continued

Gains or losses on buying reinsurance are recognised in the statement of profit or loss immediately at the date of purchase and are not amortised. Ceded reinsurance arrangements do not relieve the Group from its obligations to policyholders.

2.3.15.2 Prepaid reinsurance

Prepaid reinsurance are those proportions of premiums written in a year that relate to periods of risk after the statement of financial position date and is reported under reinsurance assets in the statement of financial position. Prepaid reinsurance premiums are deferred over the term of the underlying direct insurance policies for risks-attaching contracts and over the term of the reinsurance contract for losses-occurring contracts.

2.3.16 Other receivables and prepayment

Other receivables are made up of prepayments and other amounts due from parties which are not directly linked to insurance or investment contracts. Except prepayment and other receivables that are not financial assets, these are measured at amortised costs. Discounting is omitted where the effect of discounting is immaterial.

2.3.17 Deferred expenses

Deferred acquisition costs (DAC)

Those direct and indirect costs incurred during the financial period arising from the acquiring or renewing of insurance contracts are deferred to the extent that these costs are recoverable out of future premiums. All other acquisition costs are recognized as an expense when incurred.

Subsequent to initial recognition, DAC for general insurance are amortized over the period in which the related revenues are earned. The DAC asset for life insurance is amortised over the expected life of the contracts as a constant percentage of expected premiums. The deferred acquisition costs for reinsurers are amortised in the same manner as the underlying asset amortisation and is recorded in the statement of profit or loss.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period and are treated as a change in an accounting estimate.

An impairment review is performed at each reporting date or more frequently when an indication of impairment arises. When the recoverable amount is less than the carrying value, an impairment loss is recognized in the profit or loss. DAC are also considered in the liability adequacy test for each reporting period. DAC are derecognized when the related contracts are either settled or disposed of.

2.3.18 Inventories and work in progress

The Group recognises property as inventory under the following circumstances:

- property purchased for the specific purpose of resale;
- property constructed for the specific purpose of resale (work in progress under the scope of IFRS 15, ''Revenue'); and
- property transferred from investment property to inventories. This is permitted when the Group commences the property's development with a view to sale.

They are valued at the lower of cost and net realisable value. Cost comprises direct materials and, where appropriate, labour and production overheads that have been incurred in bringing the inventories and work in progress to their present location and condition.

Cost is determined using weighted average cost. Net realisable value represents the estimated selling price less estimated costs to completion and costs to be incurred in marketing, selling and distribution.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.19. Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. That is, if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

i) Right-of-use assets

The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets.

If ownership of the leased asset transfers to the Group at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset. The right-of-use assets are also subject to impairment.

ii) Lease liabilities

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating the lease, if the lease term reflects the Group exercising the option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses (unless they are incurred to produce inventories) in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the lease payments (e.g., changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

If any, the Group's lease liabilities are included in Interest-bearing loans and borrowings.

iii) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of buildings and space (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of buildings that are considered to be low value. Lease payments on short-term leases and leases of low value assets are recognised as expense on a straight-line basis over the lease term.

Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.20 Asset held for sale

The Group classifies non-current assets and disposal groups as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Costs to sell are the incremental costs directly attributable to the disposal of an asset (disposal group), excluding finance costs and income tax expense.

The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Actions required to complete the sale should indicate that it is unlikely that significant changes to the sale will be made or that the decision to sell will be withdrawn. Management must be committed to the plan to sell the asset and the sale expected to be completed within one year from the date of the classification.

Property, plant and equipment and intangible assets are not depreciated or amortised once classified as held for sale. Assets and liabilities classified as held for sale are presented separately as current items in the statement of financial position.

A disposal group qualifies as discontinued operation if it is a component of an entity that either has been disposed of, or is classified as held for sale, and: Represents a separate major line of business or geographical area of operations, is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations Or is a subsidiary acquired exclusively with a view to resale.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit or loss.

2.3.21 Investment properties

Investment properties held for rental income and capital appreciation are measured initially at cost, including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the profit or loss in the year in which they arise.

Fair values are evaluated annually by an accredited external, independent valuer, applying a valuation model.

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the profit or loss in the year of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use evidenced by the end of owner-occupation, commencement of an operating lease to another party or completion of construction or development. For a transfer from investment property to owner-occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner-occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property and equipment up to the date of the change in use.

2.3.22 Investments in subsidiaries

Investments in subsidiaries are carried in the separate statement of financial position at cost less allowance for impairment losses. Where, there has been impairment in the value of investments in subsidiaries, the loss is recognised as an expense in the period in which the impairment is identified. On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the statement of profit or loss account.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.23 Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the profit or loss in the year in which the expenditure is incurred.

The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period (five years) and the amortisation method (straight line) for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the profit or loss in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

An intangible asset is derecognised upon disposal (i.e., at the date the recipient obtains control) or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the profit or loss when the asset is derecognized.

2.3.24 Property, plant and equipment

Property, plant and equipment (excluding building) is stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment losses. Replacement or major inspection costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

Building is measured at revalued amount less accumulated depreciation and impairment losses recognised after the date of the revaluation. Valuations are performed at least once in every 5 years or when a major improvement is carried out to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Any revaluation surplus is recorded in other comprehensive income and hence, credited to the asset revaluation reserve in equity, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in the profit or loss, in which case, the increase is recognised in the profit or loss. A revaluation deficit is recognized in the profit or loss, except to the extent that it offsets an existing surplus on the same asset recognised in the asset revaluation reserve.

Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Land is not depreciated. Depreciation on property, plant and equipment is calculated using the straightline method to allocate the cost less the residual values over the estimated useful lives as follows;

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

Property and equipment - Continued

Leasehold building	over the remainder of the life of the lease
Building	2%
Leasehold improvements	20%
Plant and machinery	20%·
Motor vehicles	25%
Furniture and fittings and equipment	20%

The assets' residual values, and useful lives and method of depreciation are reviewed and adjusted, if appropriate, at each financial year end and adjusted prospectively, if appropriate.

Impairment reviews are performed when there are indicators that the carrying value may not be recoverable. Impairment losses are recognised in the profit or loss as an expense.

An item of property, plant and equipment is derecognized upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the year the asset is derecognized.

2.3.25 Statutory deposit

Statutory deposit represents fixed deposit with the Central Bank of Nigeria in accordance with section 10(3) of the Insurance Act, 2003. The deposit is recognised at cost in the statement of financial position being 10% of the statutory minimum capital requirement of N3 billion for General insurance business and of N2 billion for life business. Interest income on the deposit is recognised in the statement of profit or loss in the period the interest is earned.

2.3.26 Deposit for shares

Deposit for shares are amounts that the Company has placed with (asset) or received from subsidiary, associate or another company (liability) for the ultimate purpose of equity investment in the relevant company for which relevant regulatory formalities have not been completed at the reporting date. Deposits for shares are carried at cost less accumulated impairment losses, if any.

2.3.27 Insurance contracts

The Group issues contracts that transfer insurance risk or financial risk or both. Insurance contracts are those contracts where a party (the policy holder) transfers significant insurance risk to another party (insurer) and the latter agrees to compensate the policyholder or other beneficiary if a specified uncertain future event (the insured event) adversely affects the policyholder, or other beneficiary. Such contracts may also transfer financial risk when the insurer issues financial instruments with a discretionary participation feature. These are computed in compliance with the provisions of Sections 20, 21, and 22 of the Insurance Act 2003 as follows:

2.3.27.1 General insurance contracts

These contracts are accident and casualty and property insurance contracts. Accident and casualty insurance contracts protect the Group's customers against the risk of causing harm to third parties as a result of their legitimate activities. Damages covered include both contractual and non-contractual events. The typical protection offered is designed for employers who become legally liable to pay compensation to injured employees (employers' liability) and for individual and business customers who become liable to pay compensation to a third party for bodily harm or property damage (public liability). Property insurance contracts mainly compensate the Group's customers for damage suffered to their properties or for the value of property lost. Customers who undertake commercial activities on their premises could also receive compensation for the loss of earnings caused by the inability to use the insured properties in their business activities (business interruption cover).

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.27 Insurance contracts - Continued

(i) Reserves for unearned premium

In compliance with Section 20 (1) (a) of Insurance Act 2003, the reserve for unearned premium is calculated on a time apportionment basis in respect of the risks accepted during the year.

(ii) Reserves for outstanding claims

The reserve for outstanding claims is maintained at the total amount of outstanding claims incurred and reported plus claims incurred but not reported ("IBNR") as at the reporting date. The IBNR is based on the liability adequacy test.

2.3.27.2 Life business

These contracts insure events associated with human life (for example, death or survival). These are divided into the individual life, group life and annuity contracts.

Individual life contracts are usually long-term insurance contracts and span over one year while the group life insurance contracts usually cover a period of 12 months. A liability for contractual benefits that are expected to be incurred in the future when the premiums are recognised. The liability is determined as the sum of the expected discounted value of the benefit payments and the future administration expenses that are directly related to the contract, less the expected discounted value of the theoretical premiums that would be required to meet the benefits and administration expenses based on the valuation assumptions used. The liability is based on assumptions as to mortality, persistence, maintenance expenses and investment income that are established at the time the contract is issued.

2.3.27.3 Annuity contracts

These contracts insure customers from consequences of events that would affect the ability of the customers to maintain their current level of income. There are no maturity or surrender benefits. The annuity contracts are fixed annuity plans. Policy holders make a lump sum payment recognised as part of premium in the period when the payment was made. Constant and regular payments are made to annuitants based on terms and conditions agreed at the inception of the contract and throughout the life of the annuitants. The annuity funds are invested in long term government bonds and reasonable money markets instruments to meet up with the payment of monthly/quarterly annuity payments. The annuity funds liability is actuarially determined based on assumptions as to mortality, persistence, maintenance expenses and investment income that are established at the time the contract is issued.

(i). Life fund

This is made up of net liabilities on policies in force as computed by the actuaries at the time of the actuarial valuation.

Liability adequacy test

At each end of the reporting period, liability adequacy tests are performed by an Actuary to ensure the adequacy of the contract liabilities net of related DAC assets. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss initially by writing off DAC and by subsequently establishing a provision for losses arising from liability adequacy tests "the unexpired risk provision".

2.3.28 Investment contracts

Investment contract liabilities are recognised when contracts are entered into and premiums are charged. These liabilities are initially recognised at fair value, this being the transaction price excluding any transaction costs directly attributable to the issue of the contract. Subsequent to initial recognition, the investment contract liabilities are measured at fair value through profit or loss.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.28 Investment contracts - Continued

Deposits and withdrawals are recorded directly as an adjustment to the liability in the statement of financial position and are not recognised as gross premium in the statement of profit or loss.

The liability is derecognised when the contract expires, is discharged or is cancelled. For a contract that can be cancelled by the policyholder, the fair value of the contract cannot be less than the surrender value.

When contracts contain both a financial risk component and a significant insurance risk component and the cash flows from the two components are distinct and can be measured reliably, the underlying amounts are unbundled. Any premiums relating to the insurance risk component are accounted for on the same basis as insurance contracts and the remaining element is accounted for as a deposit through the statement of financial position as described above.

2.3.29 Deferred revenue

Rental income

Rental income arising from operating leases on investment properties is accounted for on a straight line basis over the lease terms and is included in investment income.

Reinsurance commission

This relates to commissions receivable on outwards reinsurance contracts which are deferred and amortized on a straight-line basis over the term of the expected premiums payable.

2.3.30 Taxes

2.3.30.1 Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current income tax assets and liabilities also include adjustments for tax expected to be payable or recoverable in respect of previous periods. Current income tax relating to items recognised directly in equity or other comprehensive income is recognised in equity or other comprehensive income and not in the profit or loss.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions, where appropriate tax/back duty assessments are recognized when assessed and agreed to by the Group with the Tax authorities, or when appealed, upon receipt of the results of the appeal.

2.3.30.2 Deferred tax

Deferred tax is provided using the liability method in respect of temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- > In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.30Taxes

2.3.30.2 Deferred tax - Continued

Deferred tax assets are recognized for all deductible temporary differences, carry forward of unused tax credits and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized except:

Where the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint arrangements deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum tax

A Company is subject to Minimum tax in a year where it has no taxable profit on which to base its tax liabilities on. Taxes based on taxable profit for the period are treated as income tax in line with IAS 12; whereas Minimum tax which is based on gross amount which is outside the scope of IAS 12 and are not presented as part of income tax expense in the profit or loss but rather presented above the income tax line as Minimum tax.

Where the minimum tax charge is higher than the Company Income Tax (CIT), a hybrid tax situation exists. In this situation, the CIT is recognised in the income tax expense line in the profit or loss and the excess amount is presented above the income tax line as minimum tax.

2.3.31 Provisions

General

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Group expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset, but only when the reimbursement is virtually certain.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.31 Provisions

General - continued

The expense relating to any provision is presented in the profit or loss net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Contingent liabilities are possible obligations that arise from past events whose existence will be confirmed only by the occurrence, or non-occurrence, of one or more uncertain future events not wholly within Group's control. Contingent liabilities are not recognized in the financial statements but are disclosed.

Onerous contracts

A provision is recognized for onerous contracts in which the unavoidable costs of meeting the obligations under the contract exceed the expected economic benefits expected to be received under it. The unavoidable costs reflect the least net cost of exiting the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.

2.3.32 Trade payable

Trade payable (Insurance payables) are recognised when due and measured on initial recognition at fair value of the consideration received less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost using the EIR method. Discounting is omitted where the effect of discounting is immaterial.

2.3.33 Equity

2.3.33.1 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets. Incremental costs directly attributable to the issue of equity instruments are recognised in equity, net of tax as a deduction from the proceeds. Where any member of the Group purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs, is reported as a separate component of equity attributable to the Company's equity holders. Where such shares are subsequently sold, reissued or otherwise disposed of, any consideration received is included in equity attributable to the Company's equity holders, net of any directly attributable incremental transaction costs and the related income tax effects.

2.3.33.2 Foreign currency translation reserve

The assets and liabilities of foreign operations are translated to Naira at closing functional currency rates at the reporting date. The income and expenses of foreign operations are translated to Naira at spot rates at the dates of the transactions. Foreign currency differences on the translation of foreign operations are recognized in other comprehensive income and accumulated in foreign currency translation reserves in the statement of financial position.

2.3.33.3 Contingency reserve

Life business

In compliance with Section 22 (1) (b) of Insurance Act 2003, the contingency reserve is credited with the higher of 1% of gross premium or 10% of net profit.

2.3.33.5 Revaluation reserve

Revaluation reserve represents the fair value differences on the revaluation of items of property, plant and equipment as at the statement of financial position date. If an asset's carrying amount is increased as a result of a revaluation, the increase is recognised in other comprehensive income and accumulated in revaluation reserve. The increase is recognised in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss. If an assets carrying amount is decreased as a result of a revaluation, the decrease is recognised in profit or loss, however, the decrease shall be recognised in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.33 Equity

2.3.33.5 Revaluation reserve - continued

The revaluation surplus in respect of an item of property, plant and equipment is transferred to retained earnings when the asset is derecognised. This involves transferring the whole of the surplus when the asset is retired or disposed. The amount of the surplus transferred is the difference between depreciation based on the revalued carrying amount of the asset and the depreciation based on the asset's original cost. Transfers from revaluation reserve to retained earnings are not made through profit or loss.

2.3.33.6 Fair value reserve

Fair value reserve represents increases or decreases in fair value of equity instruments measured at FVOCI reported directly in other comprehensive income. Gains and losses on these equity instruments are never recycled to profit or loss. The group transfers amounts from this reserve to retained earnings when the relevant equity securities are derecognized.

2.3.34 Earnings per share

The Group presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period excluding treasury shares held by the Company.

Diluted earnings per share amounts are calculated by dividing the net profit by the weighted number of ordinary shares outstanding during the year plus the weighted number of ordinary shares that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

2.3.35 Retirement obligations and Employee benefits

The Group operates the following contribution and benefit schemes for its employees:

2.3.35.1 Defined contribution pension scheme

The Group operates a defined contributory pension scheme for eligible employees. Company contributes 10% of the employees' Basic, Housing and Transport allowances in line with the provisions of the Pension Reform Act 2014. The Company pays the contributions to a pension fund administrator. The Company has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefits expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

2.3.35.2 Short-term benefits

Wages, salaries, annual leave, bonuses and non-monetary benefits are recognised as employee benefit expenses in the statement of profit or loss and paid in arrears when the associated services are rendered by the employees of the Company.

2.3.36 Changes in accounting policy and disclosures

New and amended standards and interpretations

2.3.36.1 Interest Rate Benchmark Reform - Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)

The objective of the second phase of the Board's project was to assist entities in providing useful information about the effects of the transition to alternative benchmark rates and support preparers in applying the requirements of IFRS Standards when changes are made to contractual cash flows or hedging relationships as a result of the transition to an alternative benchmark interest rate. The amendments affect the following key areas: changes in the basis for determining the contractual cash flows as a result of benchmark interest rate reform, hedge accounting and disclosures. The amendment did not have an impact on the financial statements of the Group.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.36 Changes in accounting policy and disclosures - Continued

New and amended standards and interpretations - Continued

2.3.36.2 Amendments to IFRS 16 Leasing - Covid-19 Related Rent Concessions

In May 2020, the IASB issued Covid-19-Related Rent Concessions (Amendment to IFRS 16). The pronouncement amended IFRS 16 Leases to provide lessees with an exemption from assessing whether a COVID-19-related rent concession is a lease modification. On issuance, the practical expedient was limited to rent concessions for which any reduction in lease payments affects only payments originally due on or before 30 June 2021.

Since lessors continue to grant COVID-19-related rent concessions to lessees and since the effects of the COVID-19 pandemic are ongoing and significant, the IASB decided to look into whether to extend the time period over which the practical expedient is available for use.

The application of the revised standard does not have impact on the financial statements of the Group for the period under review.

New and amended standards that are not yet effective

A number of new standards, amendment to standards and interpretations are effective for annual periods beginning after 1 January 2022 and earlier application is permitted; however, the Group has not applied the following new or amended standards in preparing these financial statements. The Group does not plan to early adopt these standards. These will be adopted in the period that they become mandatory and applicable unless otherwise indicated. Those Standards, Amendments to Standards, and interpretations which we considered may be refevant to the Group are set below;

2.3.36.3 IFRS 17 - Insurance Contracts

In May 2017, the IASB issued IFRS 17 Insurance Contracts, a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure, which replaces IFRS 4 Insurance Contracts.

In contrast to the requirements in IFRS 4, which are largely based on grandfathering previous local accounting policies for measurement purposes, IFRS 17 provides a comprehensive model (the general model) for insurance contracts, supplemented by the variable fee approach for contracts with direct participation features that are substantially investment-related service contracts, and the premium allocation approach mainly for short- duration which typically applies to certain non-life insurance contracts.

IFRS 17 supersedes IFRS 4 Insurance Contracts and aims to increase comparability and transparency about profitability. The new standard introduces a new comprehensive model ("general model") for the recognition and measurement of liabilities arising from insurance contracts. In addition, it includes a simplified approach and modifications to the general measurement model that can be applied in certain circumstances and to specific contracts, such as:

- Reinsurance contracts held:
- Direct participating contracts; and
- Investment contracts with discretionary participation features.

Under the new standard, investment components are excluded from insurance revenue and service expenses. Entities can also choose to present the effect of changes in discount rates and other financial risks in profit or loss or OCI. The new standard includes various new disclosures and requires additional granularity in disclosures to assist users to assess the effects of insurance contracts on the entity's financial statements.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.36 Changes in accounting policy and disclosures - Continued

New and amended standards that are not yet effective

The Group is in the process of determining the impact of IFRS 17 and will provide more detailed disclosure on the impact in future financial statements.

The main features of the new accounting model for insurance contracts are, as follows:

- •The measurement of the present value of future cash flows, incorporating an explicit risk adjustment, re-measured every reporting period (the fulfilment cash flows);
- •A Contractual Service Margin (CSM) that is equal and opposite to any day one gain in the fulfilment cashflows of a group of contracts. The CSM represents the unearned profitability of the insurance contracts and is recognised in profit or loss over the service period (i.e., coverage period);
- •Certain changes in the expected present value of future cash flows are adjusted against the CSM and thereby recognised in profit or loss over the remaining contractual service period;
- •The effect of changes in discount rates will be reported in either profit or loss or other comprehensive income, determined by an accounting policy choice;
- •The recognition of insurance revenue and insurance service expenses in the statement of comprehensive income based on the concept of services provided during the period;
- •Amounts that the policyholder will always receive, regardless of whether an insured event happens (non-distinct investment components) are not presented in the income statement, but are recognised directly on the balance sheet;
- •Insurance services results (earned revenue less incurred claims) are presented separately from the insurance finance income or expense;
- •Extensive disclosures to provide information on the recognised amounts from insurance contracts and the nature and extent of risks arising from these contracts.

IFRS 17 is effective for annual reporting periods beginning on or after 1 January 2023, with comparative figures required. Early application is permitted, provided the entity also applies IFRS 9 and IFRS 15 on or before the date it first applies IFRS 17. Retrospective application is required. However, if full retrospective application for a group of insurance contracts is impracticable, then the entity is required to choose either a modified retrospective approach or a fair value approach.

The Group started a project to implement IFRS 17 and has been performing the impact assessment of IFRS 17. The Group expects that the new standard will result in an important change to the accounting policies for insurance contract liabilities of the Group and is likely to have a significant impact on profit and total equity together with presentation and disclosure.

2.3.36.4 Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address the conflict between IFRS 10 and IAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that the gain or loss resulting from the sale or contribution of assets that constitute a business, as defined in IFRS 3, between an investor and its associate or joint venture, is recognised in full.

Any gain or loss resulting from the sale or contribution of assets that do not constitute a business, however, is recognised only to the extent of unrelated investors' interests in the associate or joint venture. The IASB has deferred the effective date of these amendments indefinitely, but an entity that

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.36 Changes in accounting policy and disclosures - Continued

New and amended standards that are not yet effective

early adopts the amendments must apply them prospectively. The amendments are not expected to have an impact on the financial statements of the Group.

2.3.36.5 Reference to the Conceptual Framework - Amendment to IFRS 3

On May 14, 2021, the IASB published Reference to the Conceptual Framework (Amendments to IFRS 3) with amendments to IFRS 3, Business Combinations that update an outdated reference in IFRS 3 without significantly changing its requirements. IFRS 3, Business Combinations specifies how an entity should account for the assets and liabilities it acquires when it obtains control of a business. IFRS 3 requires an entity to refer to the Conceptual Framework for Financial Reporting (Conceptual Framework) to determine what constitutes an asset or a liability.

Originally, IFRS 3 required an entity to refer to the version of the Conceptual Framework that existed when IFRS 3 was developed. The purpose of this project was to update IFRS 3 to require an entity to refer instead to a later version issued in March 2018. The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and apply prospectively. The amendments are not expected to have an impact on the financial statements of the Group.

2.3.36.6 Property, Plant and Equipment: Proceeds before Intended Use - Amendments to IAS 16 Property, Plant and Equipment - Proceeds before Intended Use (Amendments to IAS 16) amends the standard to prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented when the entity first applies the amendment.

The amendments are not expected to have an impact on the financial statements of the Group.

2.3.36.7 Onerous Contracts – Costs of Fulfilling a Contract – Amendment to IAS 37 IAS 37, Provisions, Contingent Liabilities and Contingent Assets did not specify which costs to include in estimating the cost of fulfilling a contract for the purpose of assessing whether that contract is onerous. Research conducted by the IFRS Interpretations Committee indicated that differing views on which costs to include could lead to material differences in the financial statements of entities that enter into some types of contracts.

In this project, the International Accounting Standards Board (IASB) developed amendments to IAS 37 to clarify that for the purpose of assessing whether a contract is onerous, the cost of fulfilling the contract includes both the incremental costs of fulfilling that contract and an allocation of other costs that relate directly to fulfilling contracts.

The Board issued the amendments in May 2021. The amendments are effective for contracts for which an entity has not yet fulfilled all its obligations on or after January 1, 2022 with earlier application being permitted. However, this has been critically evaluated and the Group has come to a conclusion that this would not have any impact on the financial statements of the Group.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.36 Changes in accounting policy and disclosures - Continued

New and amended standards that are not yet effective

2.3.36.8 IFRS 9: Fees in the '10 per cent' test for derecognition of financial liabilities

The amendment clarifies which fees an entity includes when it applies the '10 per cent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognise a financial liability. An entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf. The amendments are effective for annual reporting periods beginning on or after 1 January 2022 and must be applied retrospectively. The amendments are not expected to have an impact on the financial statements of the Group.

- 2.3.36.9 Classification of Liabilities as Current or Non-current (Amendments to IAS 1)
 On 23 January 2021, the International Accounting Standards Board (IASB or the Board) issued amendments to IAS 1 Presentation of Financial Statements (the amendments) to clarify the requirements for classifying liabilities as current or non-current. More specifically:
- (1) The amendments specify that the conditions which exist at the end of the reporting period are those which will be used to determine if a right to defer settlement of a liability exists.
- (2) Management expectations about events after the balance sheet date, for example on whether a covenant will be breached, or whether early settlement will take place, are not relevant.
- (3) The amendments clarify the situations that are considered settlement of a liability.

The new guidance will be effective for annual periods starting on or after 1 January 2023.

2.3.36.10 Definition of Accounting Estimates - Amendments to IAS 8

In February 2021, the IASB issued amendments to IAS 8, in which it introduces a definition of 'accounting estimates'. The amendments clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, they clarify how entities use measurement techniques and inputs to develop accounting estimates.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and apply to changes in accounting policies and changes in accounting estimates that occur on or after the start of that period. Earlier application is permitted as long as this fact is disclosed.

The amendments are not expected to have a material impact on the Group.

2.3.36.11 Disclosure of Accounting Policies - Amendments to IAS 1 and IFRS Practice Statement 2 In February 2021, the IASB issued amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements, in which it provides guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by replacing the requirement for entities to disclose their 'significant' accounting policies with a requirement to disclose their 'material' accounting policies and adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures.

The amendments to IAS 1 are applicable for annual periods beginning on or after 1 January 2023 with earlier application permitted. Since the amendments to the Practice Statement 2 provide non-mandatory guidance on the application of the definition of material to accounting policy information, an effective date for these amendments is not necessary.

The Group is currently assessing the impact of the amendments to determine the impact they will have on the Group's accounting policy disclosures.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.36 Changes in accounting policy and disclosures - Continued

New and amended standards that are not yet effective

2.3.36.12 Deferred Tax related to Assets and Liabilities arising from a Single Transaction - Amendments to IAS 12

In May 2021, the Board issued amendments to IAS 12, which narrow the scope of the initial recognition exception under IAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognised in the financial statements (and interest expense) or to the related asset component (and interest expense). This judgement is important in determining whether any temporary differences exist on initial recognition of the asset and liability.

The amendment will be effective for annual periods beginning on or after 1 January 2023. The Group is currently assessing the impact on its financials.

2.3.36.13 IFRS 1 First-time Adoption of International Financial Reporting Standards – Subsidiary as a first-time adopter

The amendment permits a subsidiary that elects to apply paragraph D16(a) of IFRS 1 to measure cumulative translation differences using the amounts reported by the parent, based on the parent's date of transition to IFRS. This amendment is also applied to an associate or joint venture that elects to apply paragraph D16(a) of IFRS 1.

An entity applies the amendment for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted. These amendments will currently have no impact on the financial statement of the Group.

2.3.37 Significant accounting judgements, estimates and assumptions

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future reporting periods.

Other disclosures relating to the Group's exposure to risks and uncertainties includes:

- 1. Insurance risk management Note 3.1.1
- 2. Financial risk management and policies Note 3.1.2
- 3. Capital management Note 3.2

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

Property lease classification - Group as lessor

The Group has entered into commercial property leases on its investment property portfolio. The Group has determined, based on an evaluation of the terms and conditions of the arrangements, such as the lease term not constituting a major part of the economic life of the commercial property and the present value of the minimum lease payments not amounting to substantially all of the fair value of the asset, that it retains all the significant risks and rewards of ownership of these properties and accounts for the contracts as operating leases.

Estimates and assumptions

In the process of applying the Group's accounting policies, management has made the following judgements which have the most significant effect on the amounts recognise in the financial statements:

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.37 Significant accounting judgments, estimates and assumptions - Continued

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

The Group based its assumption and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur. Estimates and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Life insurance contract liabilities

Life insurance liabilities are recognised when contracts are entered into and premiums are charged. These liabilities are measured using the net premium method. The liability is determined as the sum of the discounted value of the expected future benefits, claims handling and policy administration expenses, policyholder options and guarantees and investment income from assets backing such liabilities, which are directly related to the contract, less the discounted value of the expected premiums that would be required to meet the future cash outflows based on the valuation assumptions used. The liability is either based on current assumptions or calculated using the assumptions established at the time the contract was issued, in which case, a margin for risk and adverse deviation is generally included. A separate reserve for longevity may be established and included in the measurement of the liability. Furthermore, the liability for life insurance contracts comprises the provision for unearned premiums and premium deficiency, as well as for claims outstanding, which includes an estimate of the incurred claims that have not yet been reported to the Group. Adjustments to the liabilities at each reporting date are recorded in the statement of profit or loss in 'Gross change in contract liabilities'. Profits originated from margins for adverse deviations on run-off contracts are recognised in the statement of profit or loss over the life of the contract, whereas losses are fully recognised in the statement of profit or loss during the first year of run-off. The liability is derecognised when the contract expires, is discharged or cancelled.

The estimation of the ultimate liability arising from claims made under insurance contracts is the Group's most critical accounting estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the company will ultimately pay for such claims. The uncertainty arises because all events affecting the ultimate settlement of the claims have not taken place and may not take place for some time.

Changes in the estimate of the provision may be caused by receipt of additional claim information, changes in judicial interpretation of contract, or significant changes in severity or frequency of claims from historical records. The estimates are based on the company's historical data and industry experience. The ultimate claims liability computation is subjected to a liability adequacy test by an actuarial consultant using actuarial models.

The provision for unearned premiums represents that portion of premiums received or receivable that relates to risks that have not yet expired at the reporting date. The provision is recognised when contracts are entered into and premiums are charged and is brought to account as premium income over the term of the contract in accordance with the pattern of insurance service provided under the contract.

Fair value of investment property

The valuation of investment properties is based on the price for which comparable land and properties are being exchanged hands or are being marketed for sale. Therefore, the market-approach Method of Valuation. By nature, detailed information on concluded transactions is difficult to come by. The past transactions and recent adverts are being relied upon in deriving the value of the subject properties. At least, three properties have been analysed and compared with the subject property.

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

2.3.37 Significant accounting judgments, estimates and assumptions - Continued

Estimates and assumptions

Impairment losses on financial assets

The measurement of impairment losses both under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

The Group's internal credit grading model, which assigns PDs to the individual grades

- The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models

Fair value of financial instruments using valuation techniques

The Directors use their judgment in selecting an appropriate valuation technique. Where possible, financial instruments are marked at prices quoted in active markets. In the current market environment, such price information is typically not available for all instruments and the company uses valuation techniques to measure such instruments. These techniques use "market observable inputs" where available, derived from similar assets in similar and active markets, from recent transaction prices for comparable items or from other observable market data. For positions where observable reference data are not available for some or all parameters the company estimates the non-market observable inputs used in its valuation models.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS

For the year ended 31 December 2021

3.1 Management of Insurance and financial risks

3.1.1 Insurance risks management

The principal risk the Group faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Group is to ensure that sufficient reserves are available to cover these liabilities.

The risk exposure is mitigated by diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements.

The Group purchases reinsurance as part of its risks mitigation programme. Reinsurance ceded is placed on both a proportional and non-proportional basis. The majority of proportional reinsurance is quota-share reinsurance which is taken out to reduce the overall exposure of the Group to certain classes of business. Non-proportional reinsurance is primarily excess-of-loss reinsurance designed to mitigate the Group's net exposure to catastrophe losses. Retention limits for the excess-of-loss reinsurance vary by product line and territory.

Amounts recoverable from reinsurers are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contracts. Although the Group has reinsurance arrangements, it is not relieved of its direct obligations to its policyholders and thus a credit exposure exists with respect to ceded insurance, to the extent that any reinsurer is unable to meet its obligations assumed under such reinsurance agreements. The Group's placement of reinsurance is diversified such that it is neither dependent on a single reinsurer nor are the operations of the Group substantially dependent upon any single reinsurance contract.

(a) Life insurance contracts

Life insurance contracts offered by the Group include: whole life, term assurance, annuities plan, anticipated endowment insurance, mortgage protection, individual Savings and Protection, Child Education, Mutual Education Guarantee Assurance and Keyman assurance policy.

Term Assurance is a form of Life insurance policy that pays out a lump sum (Sum Assured) in the event of the death of the policy holder. The insurance can be extended to cover permanent disability and medical expenses insurred as a result of an accident.

Mortgage Protection policy is a reducing term assurance scheme which guarantees the payment of balance outstanding in respect of the loan given by a financial institution (Mortgage) to a Life Assured (Mortgagor) should he die before the loan is fully repaid.

Endowment assurance policy pays to the beneficiaries of a deceased assured compensation which is equal to the Sum Assured selected by him/her from the commencement of the policy. It also guarantees that the capital sum (Sum Assured) all the accrued reversionaty bonuses over the years be paid in the event that he/she survives till the end of the insurance year.

Individual Savings and Protection Plan is an anti-inflationary and income protection plan designed to assist all categories of individual cultivate a consistent savings culture and provide for their beneficialries at death. A plan holder starts making a compulsory and regular savings for a number of years, which shall not be less than five years. Flexibility in the frequency of the premium payment is allowed.

Annuity Plan is a contract to pay a set amount (the annuity) every month or quarter while the annuitant (the person on whose life the contract depends) is still alive. Annuities are usually expressed in terms of the annual amount payable although in practice they can be payable monthly, quarterly, half-yearly or yearly. There are immediate Annuity Plan, Deferred Annuity Plan, Guaranteed Annuity Plan, Annuity Certain and increasing Annuity.

The main risks that the Group is exposed to are as follows:

- ► Mortality risk risk of loss arising due to policyholder death/health experience being different than expected
- ► Longevity risk risk of loss arising due to the annultant living longer than expected
- ▶ Investment return risk risk of loss arising from actual returns being different than expected
- ► Expense risk risk of loss arising from expense experience being different than expected
- ▶ Policyholder decision risk risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

(a) Life insurance contracts - Continued

These risks do not vary significantly in relation to the location of the risk insured by the Group, type of risk insured or by industry.

The Group's underwriting strategy is designed to ensure that risks are well diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors and geography, the use of medical screening in order to ensure that pricing takes account of current health conditions and family medical history, regular review of actual claims experience and product pricing, as well as detailed claims' handling procedures. Underwriting limits are in place to enforce appropriate risk selection criteria. For example, the Group has the right not to renew individual policies, it can impose deductibles and it has the right to reject the payment of fraudulent claims. Insurance contracts also entitle the Group to pursue third parties for payment of some or all costs. The Group further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Group.

For contracts for which death or disability is the insured risk, the significant factors that could increase the overall frequency of claims are epidemics, widespread changes in lifestyle and natural disasters, resulting in earlier or more claims than expected. Group life reinsurance retention limits of N25,000,000 on any single life insured and on all high risk individuals insured are in place.

The Insurance risk described above is also affected by the contract holder's right to pay reduced premiums or no future premiums, to terminate the contract completely or to exercise guaranteed annuity options. As a result, the amount of insurance risk is also subject to contract holder behaviour.

The following tables show the concentration of life insurance contract liabilities.

		GROUP		COMPANY

Key assumptions

Material judgement is required in determining the liabilities and in the choice of assumptions. Assumptions in use are based on past experience, current internal data, external market indices and benchmarks which reflect current observable market prices and other published information. Assumptions and prudent estimates are determined at the date of valuation and no credit is taken for possible beneficial effects of voluntary withdrawals. Assumptions are further evaluated on a continuous basis in order to ensure realistic and reasonable valuations.

The key assumptions to which the estimation of liabilities is particularly sensitive are, as follows:

Mortality and morbidity rates

Assumptions are based on standard industry and national tables, according to the type of contract written and the territory in which the insured person resides. They reflect recent historical experience and are adjusted when appropriate to reflect the Group's own experiences. An appropriate, but not excessive, prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type.

An increase in rates will lead to a larger number of claims (and claims could occur sooner than anticipated), which will increase the expenditure and reduce profits for the shareholders.

► Longevity

Assumptions are based on standard industry and national tables, adjusted when appropriate to reflect the Group's own risk experience. An appropriate, but not excessive, prudent allowance is made for expected future improvements. Assumptions are differentiated by sex, underwriting class and contract type. An increase in longevity rates will lead to an increase in the number of annuity payments to be made, which will increase the expenditure and reduce profits for the shareholders.

► Lapse and surrender rates

Lapses relate to the termination of policies due to non-payment of premiums. Surrenders relate to the voluntary termination of policies by policyholders. Policy termination assumptions are determined using statistical measures based on the Group's experience and vary by product type, policy duration and sales trends.

An increase in lapse rates early in the life of the policy would tend to reduce profits for shareholders, but later increases are broadly neutral in effect.

▶ Discount rate

Life insurance liabilities are determined as the sum of the discounted value of the expected benefits and future administration expenses directly related to the contract, less the discounted value of the expected theoretical premiums that would be required to meet these future cash outflows. Discount rates are based on current industry risk rates, adjusted for the Group's own risk exposure.

A decrease in the discount rate will increase the value of the insurance liability and therefore reduce profits for the shareholders.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

(a) Life insurance contracts - Continued

Sensitivities

The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and equity. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis. It should be noted that movements in these assumptions are non-linear. Sensitivity information will also vary according to the current economic assumptions, mainly due to the impact of changes to both the intrinsic cost and time value of options and guarantees. When options and guarantees exist, they are the main reason for the asymmetry of sensitivities. The method used for deriving sensitivity information and significant assumptions made did not change from the previous period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

3.1.2 Financial risk management

Introduction and overview

The Group is exposed to a range of financial risks through its financial instruments, insurance assets and insurance liabilities. The key financial risk is that in the long term its investments proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of the financial risks are:

- (a) Credit risk
- (b) Liquidity risk
- (c) Market risk

(a) Credit risk

Credit risk is the risk that one party to a financial instrument or reinsurance contract will cause a financial loss for the other party by failing to discharge an obligation.

Mutual Benefits Life Assurance Group is exposed to risk relating to its loan and receivables, finance lease receivable, statutory deposits, bank balances, debt instruments at amortised cost, financial assets at FVPL, reinsurance receivables and trade receivables. Its receivables comprise trade receivables from customers, reinsurers and coinsurers recoverables and other receivables. There are no financial assets that are classified as past due and impaired whose terms have been negotiated.

The following policies and procedures are in place to mitigate the Group's exposure to credit risk:

The Group's credit risk policy sets out the assessment and determination of what constitutes credit risk for the Group. Compliance with the policy is monitored and exposures and breaches are reported to the Group's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.

Credit risk relating to financial instruments is monitored by the investments team of the Group. It is their responsibility to review and manage credit risk, including environmental risk for all of counterparties. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for industry concentrations, and by monitoring exposures in relation to such limits. It is the Group's policy to invest in high quality financial instruments with a low risk of default. If there is a significant increase in credit risk, the policy dictates that the instrument should be sold and amounts recovered reinvested in high quality instruments.

Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by following policy guidelines in respect of counterparties' limits that are set each year by the board of directors and are subject to regular reviews. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy.

The credit risk in respect of customer balances incurred on non-payment of premiums or contributions (trade receivables) will only persist during the grace period specified in the policy document or trust deed until expiry, when the policy is either paid up or terminated. The contractual credit agreement is strictly in line with the regulator's "No Premium, No Cover" policy. Stringent measures have been placed by the regulator to guide against credit default. Credit risk exposure operates from the level of brokered transactions with little emphasis placed on direct business. The Group's credit risk exposure to brokered business is very low as the Group requires brokers to provide credit note which is due 30 days from receipt before incepting insurance cover on behalf of their clients. In addition, commission paid to intermediaries is netted off against amounts receivable from them to reduce the risk of default.

The nature of the Group's exposure to credit risks and its objectives, policies and processes used to manage and measure the risks have not changed from the previous period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

3.1.2 Financial risk management

(i) The Group's internal rating process

The Group's investment team prepares internal ratings for instruments held in which its counterparties are rated using internal grades (investment grade, non-investment grade (satisfactory), non-investment grade (unsatisfactory), past due but not impaired, and individually impaired). The ratings are determined incorporating both qualitative and quantitative information that builds on information from risk rating agencies, supplemented with information specific to the counterparty and other external information that could affect the counterparty's behaviour. These information sources are first used to determine whether an instrument has had a significant increase in credit risk. The Group's internal credit rating grades:

		Agusto & Co. rating	Basis for ECL	
Internal rating grade	Internal rating description	(when applicable)	Provision	Basis for Interest Income Calculation
1-2	Investment grade	Aaa	12 month ECL	Gross carrying amount
3	Investment grade	Aa	12 month ECL	Gross carrying amount
4	Investment grade	Α	12 month ECL	Gross carrying amount
5	Non-investment grade (satisfactory)	Bbb	Lifetime ECL	Gross carrying amount
6-7	Non-investment grade (unsatisfactory)	Bb	Lifetime ECL	Amortized cost
8-9	Non-investment grade (unsatisfactory)	В	Lifetime ECL	Amortized cost
10	Past due but not impaired	С	Lifetime ECL	Amortized cost
11-12	Individually impaired	D	Lifetime ECL, credit impaired	None

(ii) Maximum exposure to credit risk

The maximum exposure is shown gross, before the effect of impairment and mitigation. The maximum risk exposure presented below does not include the exposure that arises in the future as a result of the changes in values. The credit risk analysis below is presented in line with how the Group manages the risk. The Group manages its credit exposure based on the carrying value of the financial instruments and insurance and reinsurance assets.

Below is the analysis of the group's and company's maximum exposure to credit risk at the year end.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

(iv) Credit collateral

The Group holds collateral and other credit enhancement s against certain of its credit exposures. The following table sets out the principal types of collateral held against different types of financial assets.

		Percentage of exposure	e that is subject to collateral		<u></u>
	Gr	oup	Comp	any	Principal type of collateral held
Financial assets	2021	2020	2021	2020	
Loans to oil & gas sector	100%	100%	100%	100%	Oil & gas assets.
Loans to construction sector	100%	100%	100%	100%	Real estate properties, inventory.
Loans to policyholders	100%	100%	100%	100%	Cash deposits.
Staff loans	100%	100%	100%	100%	Real estate properties, vehicles, securities.
Finance lease	100%	100%	100%	100%	Underlying assets.

The loan-to-value (LTV) ratio of the financial assets above is not more than 100%. LTV is calculated as the ratio of the gross amount of the loan to the value of the collateral. The valuation of the collateral excludes any adjustments for obtaining and selling the collateral. The value of the collateral for residential mortgage loans is based on the collateral value at origination updated based on changes in house price indices. For credit-impaired loans the value of collateral is based on the most recent appraisals.

(v) (a) Significant increase in credit risk, default and cure

The Group continuously monitors all assets subject to ECLs. In order to determine whether an instrument or a portfolio of instruments is subject to 12mECL or LTECL, the Group assesses whether there has been a significant increase in credit risk since initial recognition.

The Group considers that there has been a significant increase in credit risk when any contractual payments are more than 30 days past due. In addition, the Group also considers a variety of instances that may indicate unlikeliness to pay by assessing whether there has been a significant increase in credit risk. Such events include:

- · Internal rating of the counterparty indicating default or near-default
- · The counterparty having past due liabilities to public creditors or employees
- The counterparty (or any legal entity within the debtor's group) filing for bankruptcy application/protection
- · Counterparty's listed debt or equity suspended at the primary exchange because of rumours or facts about financial difficulties

The Group considers a financial instrument defaulted and, therefore, credit-impaired for ECL calculations in all cases when the counterparty becomes 90 days past due on its contractual payments. The Group may also consider an instrument to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full. In such cases, the Group recognizes a lifetime ECL.

In rare cases when an instrument identified as defaulted, it is the Group's policy to consider a financial instrument as 'cured' and therefore re-classified out of credit-impaired when none of the default criteria have been present for at least twelve consecutive months.

There has been no significant increase in credit risk or default for financial assets during the year.

(v) (b) Expected credit loss

The Group assesses the possible default events within 12 months for the calculation of the 12mECL. Given the investment policy, the probability of default for new instruments acquired is generally determined to be minimal.

In rare cases where a lifetime ECL is required to be calculated, the probability of default is estimated based on economic scenarios.

(vi) Impairment losses on financial investments subject to impairment assessment

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's internal credit rating system and year-end stage classification. The amounts presented are gross of impairment allowances. Details of the Group's internal grading system are explained in Note 3.1.2 (a) (i).

(b) Liquidity risk

Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost. The Group mitigates this risk by monitoring cash activities and expected outflows. The Group's current liabilities arise as claims are made and clients request for termination of their investment-linked products. The Group has no material commitments for capital expenditures and there is no need for such expenditures in the normal course of business. Claims payments are funded by current operating cash flow including investment income.

The Group's investment policy requires a reasonable percentage of the Group's life portfolio be held in cash and cash equivalents; this highlights availability of liquid marketable securities sufficient to meet its liabilities as at when due. Cash and cash equivalents include treasury bills and term deposits with an original maturity of less than 90 days.

For insurance contracts liabilities and reinsurance assets, maturity profiles are determined based on estimated timing of net cash outflows from the recognised insurance liabilities. Unearned premiums have been excluded from the analysis as they are not contractual obligations.

The Group maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseeable interruption of cash flow.

Below is a summary of undiscounted contractual cashflows of financial assets matched with financial liabilities.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

(c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk: foreign exchange rates (currency risk) and market interest rates (interest rate risk).

Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group's principal transactions are carried out in Naira and its exposure to foreign exchange risk arise primarily with respect to the US dollar, pound sterling and CFA Franc.

The Group's financial assets are primarily denominated in the same currencies as its insurance and investment contract liabilities. Thus, the main foreign exchange risk arises from recognised assets and liabilities denominated in currencies other than those in which insurance and investment contract liabilities are expected to be settled.

Mutual Benefits Life Assurance Limited is exposed to foreign exchange currency risk primarily through undertaking certain transactions denominated in foreign currency. The Group exposure to foreign currency risk through its investment in short term placements, foreign domiciliary bank balance and its net investment in foreign subsidiaries.

The following analysis is performed for reasonably possible movements in key variables with all other variables held constant, showing the Impact on profit before tax and equity due to changes in the fair value of currency sensitive monetary assets and liabilities including insurance contract claim liabilities. The correlation of variables will have a significant effect in determining the ultimate impact of currency risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear. The method used for deriving sensitivity information and significant variables did not change from the previous period.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

(c) Market risk

ii Interest-rate risi

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Fixed interest rate instruments expose the Group to fair value interest risk. The Group is not expose to cash flow interest risk and the group do not have floating interest bearing financial instruments.

The Group has no significant concentration of interest rate risk.

3.2 Capital Management

The National Insurance Commission (NAICOM), sets and monitors capital requirements for Insurance Companies. The individual subsidiaries are directly supervised by other regulators, i.e, Mutual Benefits Microfinance Bank Limited is regulated by the Central Bank of Nigeria, Mutual Benefits Niger Limited by Conference Interafricaine Des Marches D's assurance (CIMA) and Mutual Benefits Liberia Limited are being regulated by Central Bank of Liberia respectively.

The Group's policy is to maintain a strong capital base to maintain investor, creditor and market confidence and to sustain the future development of the business. The impact of the level of capital on shareholders' return is also recognised and the Group recognises the need to maintain a balance between the higher returns that might be possible with greater gearing and the advantages and security afforded by a sound capital position. The Group and its individually regulated operations have complied with all externally imposed capital requirements.

Management uses regulatory capital ratios to monitor its capital base. The allocation of capital between specific operations and activities is, to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily on the regulatory capital, but in some cases the regulatory requirements do not fully reflect the varying degree of risk associated with different activities. In such cases, the capital requirements may be flexed to reflect differing risk profiles, subject to the overall level of capital to support a particular operation or activity not falling below the minimum required for regulatory purposes. The process of allocating capital to specific operations and activities is undertaken independently of those responsible for the operation by Group Risk and Group Credit, and is subject to review by the Group Credit Committee or the Group Asset and Liability Management Committee (ALCO), as appropriate. The Group ensures it maintains the minimum required capital at all times throughout the year. The table below summarises the minimum required capital across the Group and the regulatory capital held against each of them.

Capital management objectives, policies and approach

The Group has established the following capital management objectives, policies and approach to managing the risks that affect its capital position:

- 1 To maintain the required level of stability of the Group thereby providing a degree of security to policyholders;
- 2 To allocate capital efficiently and support the development of business by ensuring that returns on capital employed meet the requirements of its capital providers and of its shareholders;
- 3 To retain financial flexibility by maintaining strong liquidity and access to a range of capital markets;
- To align the profile of assets and liabilities taking account of risks inherent in the business;
- 5 To maintain financial strength to support new business growth and to satisfy the requirements of the policyholders, regulators and stakeholders;
- 6 To maintain strong credit ratings and healthy capital ratios in order to support its business objectives and maximise shareholders value.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

3.2 Capital Management - Continued

Capital management objectives, policies and approach

In reporting financial strength, capital and solvency are measured using the rules prescribed by the National Insurance Commission. These regulatory capital tests are based upon required levels of solvency, capital and a series of prudent assumptions in respect of the type of business written.

The Company's capital management policy for its insurance business is to hold sufficient capital to cover the statutory requirements based on the NAICOM directives, including any additional amounts required by the regulator.

The Company seeks to optimise the structure and sources of capital to ensure that it consistently maximises returns to the shareholders and policyholders.

The Company has had no significant changes in its policies and processes to its capital structure during the past year from previous years.

3.3 Asset and Liability Management

The Company is exposed to a financial risks through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that in the long-term its investment proceeds are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important components of this financial risk are liquidity risk and credit risk.

The Company manages these positions within an ALM framework that has been developed to achieve longterm investment returns in excess of its obligations under insurance and investment contracts. Within the ALM framework, the Group periodically produces reports at portfolio, legal entity and asset and liability class level that are circulated to the Group's key management personnel. The principal technique of the Company's ALM is to match assets to the liabilities arising from insurance and investment contracts by reference to the type of benefits payable to contract holders. For each distinct class of liabilities, a separate portfolio of assets is maintained. The Company has not changed the processes used to manage its risks from previous periods.

The Company's ALM is integrated with the management of the financial risks associated with the Company's other classes of financial assets and liabilities not directly associated with insurance and investment liabilities (in particular, borrowings and investments in foreign operations). The notes below explain how financial risks are managed using the categories utilized in the Company's ALM framework.

The table below hypothecates the total assets of the Company into assets that represents insurance funds, shareholders' funds and other funds such as investment contracts:

Debt Instruments at amortised cost	20.2	23,797,398	22,938,135	22,745,277	22,898,368
		23,797,398	22,938,135	22,745,277	22,898,368

3.5 Fair value hierarchy

The Group's accounting policy on fair value measurements is discussed under note 2.3.11.

The fair values of financial assets and liabilities that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, the group determines fair values using other valuation techniques.

For financial instruments that trade infrequently, and had little price transparency, fair value is less objective, and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risk affecting the specific instrument.

Valuation models

The group measures fair values using the following fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the group is the current bid price. These instruments are included in Level 1. Instruments included in Level 1 comprise primarily Nigerian Stock Exchange equity investments classified as trading securities.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

3.5 Fair value hierarchy - Continued

Financial instruments in level 2

Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Financial instruments in level 3

Level 3: inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The table below analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorized. The amounts are based on the values recognised in the statement of financial position.

Financial instruments measured at fair value

The following table analyses financial instruments measured at fair value at the end of the reporting period, by the level in the fair value hierarchy into which the fair value measurement is categorised:

Unobservable inputs used in measuring fair value

Information about the fair value measurement using significant unobservable inputs (Level 3)

The equity sensitivity measures the impact of a +/-500bps movement in the comparative companies. The sensitivity of the fair values of investment in unlisted equities to changes in the Enterprise value/Sales (EV/sales) multiples and Price to book (P/B) of the comparative companies as at 31 December 2021 is as shown in the table below:

				GR	OUP	CON	PANY

					_				
Loans and advances	•	•	-	-		-	-	-	-
Debt Instruments at amortised cost		22,938,135	•	22,938,135			22,898,368	-	22,898,368

22,938,135

22,898,368

22,898,368

Fair value of financial assets and liabilities

Below are the methodologies and assumptions used to determine fair values for those financial instruments in the financial statements:

22,938,135

Assets and liabilities for which fair value approximates carrying value

The management assessed that cash and cash equivalents, trade receivables, reinsurance receivables, other receivables, trade payables, other liabilities and deposit liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

Loans and receivables

The fair values of loans and receivables are based on cash flows discounted using a rate based on the market interest rate of borrowings. The discount rate equals the prime lending rate as set by the Central Bank of Nigeria at the reporting dates. The fair values are within Level 2 of the fair value hierarchy.

Debt instruments at amortised cost

The fair values of debt instruments at amortised cost are based on cash flows discounted using a rate based on the FMDQ market yield of the instruments. The fair values are within Level 1 of the fair value hierarchy.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

For the year ended 31 December 2021

3.5 Fair value hierarchy - Continued

Non financial asset measured at fair value

Investment property is a recurring fair value measurement valued using the market approach method of valuation. The valuation of the properties is based on the price for which comparable land and properties are being exchanged and/or are being marketed for sale. Therefore, the market-approach Method of Valuation was used. See Note 26 for the details of the description of valuation techniques used and key inputs to valuation on investment properties.

Significant unobservable valuation input:

Price per square metre Range: (N1,167 - N510,662)

Significant increases (decreases) in estimated price per square metre in isolation would result in a significantly higher (lower) fair value.

		Group				ıy			
in thousands of Nigerian Naira		Level 1	Level 2	Level 3	Total	 Level 1	Level 2	Level 3	Total
investment properties	31 Dec 2021	•	-	6,035,000	6,035,000	-	-	6,035,000	6,035,000
Investment properties	31 Dec 2020	•	•	6,665,000	6,665,000	•	•	6,665,000	6,665,000

During the reporting year ended 31 December 2021, there were no transfers between level 1 and level 2 and in and out of level 3.

3.6 Segment Information

The Group is organized into three operating segments. These segments distribute their products through various forms of brokers, agencies and direct marketing programs. Management identifies its reportable operating segments by product line consistent with the reports used by the Management Investment and Underwriting Committee. These segments and their respective operations are as follows:

Assurance business: This segment covers the protection of customers' assets (Particularly their properties, both for personal and commercial business) and indemnification of other parties that have suffered damage as a result of customers accident. All contracts in this segment are short term in nature. Revenue in this segment is derived primarily from insurance premium, investment income, net realised gains on financial assets, and net fair value gains on financial assets at fair value through profit or loss and the protection of the Group's customers against the risk of premature death, disability, critical illness and other accidents. Revenue from this segment is derived primarily from insurance premium, investment income, net realized gains on financial assets and net fair value gains on financial assets held for trading.

Real Estate: The Group undertakes real estate development project with the aim of outright sale or lease of the properties to meet the needs of individual and corporate bodies. The Group offers various products in real estate to meet client needs while promoting value adding business relationships and utilizes a combination of debt and equity finance to provide funds for projects. Revenue from this segment is derived primarily from property sale, fee income and investment income.

Microfinance Banking: The Group undertakes provision of retails and microfinance banking services at the community level. Revenue from this segment is derived primarily interest on micro loans and advances, SME loans, overdraft, fees and commission and investment income.

On 1 August 2020, the Company restructured the loan facility to Prime Exploration and Production Limited (PEPL) for the development and production of hydrocarbons in Asaramatoru marginal oil field on the following key terms

- -The bullet payment of N11,363,929,724 due on the old loan on 31 July 2020 was rolled over as the principal of the new facility.
- -A tenure period of 5 years to end on the 1 August 2025, subject to a 12 months moratorium on principal and interest
- -Interest rate of 15% per annum
- -Repayment sum of N700million payable every four months to commence on 1 August 2021
- -A bullet payment of N11,770,094,000 is due on 1 August 2025

Security for the loan include the following:

- First charge over oil asset of Asaramatoru Marginal Field
- First charge on all receivables under oil contract throughout the tenor of the facility
- No distribution of profit of PEPL until the funds (principal and interest) advanced by the Company is fully repaid.

PEPL and Suffolk Petroleum Services Limited were awarded Asaramatoru Marginal Field in Oil Mining Lease (OML) in 2003 with PEPL holding 51 percent participating interest and Suffolk Petroleum Limited holding 49 percent interest.

20.2.1.3 Loan to Mutual Homes and Properties Limited

Included in loans and advances for the Company is the loan balance of ₹200,140,000 (2020: ₹200,140,000) granted to Mutual Benefits Homes and Properties Limited. The details is as follow:

Underwriting expenses can be sub-divided into commission expenses (acquisition costs) and maintenance costs. Commission expenses are those incurred in obtaining and renewing insurance contracts. They include commissions or brokerage paid to agents or brokers and any other indirect expenses. Maintenance costs are those incurred in servicing existing policies/contracts. These include processing costs, preparation of statistics and reports, and other incidental costs attributable to maintenance.

18 (Loss)/earnings per share

18.1 (Loss)/earnings per share - Basic

Basic Loss/Earnings per share is calculated by dividing the loss/profit for the year attributable to ordinary equity holders of the parent by the weighted average number of ordinary shares outstanding during the year.

The following table reflects the income and share data used in the basic loss/earning per share computations:

			GROU	JP .	COMPA	ANY
	in thousands of Nigerian Naira	Notes	2021	2020	2021	2020
	(Loss)/profit attributable to equity holders		(3,127,875)	3,268,960	(3,210,421)	3,384,814
	Weighted average number of ordinary					
	shares for basic earnings per share	18.2	8,002,500	8,002,500	8,002,500	8,002,500
	Basic (loss)/earnings per ordinary share (kobo)		(39)	41	(40)	42
18.2	Weighted average number of ordinary shares	- basic	1			
	Issued ordinary shares at 1 January		8,002,500	330,000	8,002,500	330,000
	Issued during the year		•	7,672,500	•	7,672,500
	As at 31 December		8,002,500	8,002,500	8,002,500	8,002,500
	Weighted average number of ordinary shares for basic earnings per share in line with IAS 33		8,002,500	8,002,500	8,002,500	8,002,500
18.3	Earnings per share- Diluted					
	Weighted average number of ordinary shares for diluted earnings per share	18.2	8,002,500	8,002,500	8,002,500	8,002,500
	As at 31 December		8,002,500	8,002,500	8,002,500	8,002,500
	Diluted earnings per ordinary share (kobo)		(39)	41	(40)	42
	Weighted average number of ordinary					
	shares for diluted earnings per share in line with IAS 33		8,002,500	8,002,500	8,002,500	8,002,500

The issued and fully paid ordinary shares were increased to 8,002,500,000 from the allotment of bonus shares on the 15 October 2020 from the Share premium and retained earnings at the rate of 93 new ordinary shares for every 4 old shares held by the shareholders of the Company.

19.1 Cash and cash equivalents

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short-term deposits are made for varying periods of between one day and three months, depending on the immediate cash requirements of the Group. All short-term deposits are subject to an average variable interest rate of 5.5% per annum (2020: 4.8%).

For the purpose of the statement of cash flows, the cash and cash equivalents consist of cash and short-term deposits, as defined above and are subject to insignificant change in fair value, and used by the Group to manage its short term cash commitments.

30 Statutory deposit

This represents amounts deposited with the Central Bank of Nigeria (CBN) pursuant to Section 10(3) of the Insurance Act, 2003. This amount is not available for the day-to-day use in the working capital of the Company and so it is excluded from the cash and cash equivalents. Interest earned at annual average rate of 3% per annum (2020: 13.05%) on statutory deposits are included in investment income (Note 9).

The deposit has been tested for adequacy as at 31 December 2021 and found to be adequate.

38 Deferred tax

Unrecognised deferred tax assets

Deferred tax assets relating to the Company's life business have not been recognised in respect of the following items because of the uncertainty in the availability of future taxable profit against which the life business can use the benefits therefrom.

			GR	OUP	COMPANY	
	in thousands of Nigerian Naira	Notes	31 Dec-2021	31 Dec-2020	31 Dec-2021	31 Dec-2020

Issue of bonus share capital		(116,555)	(5,553,445)	(116,555)	(5,553,445)
Balance at the end of the year		•	116,555	•	116,555

Share premium comprises additional paid-in capital in excess of the par value. This reserve is not ordinarily available for distribution. In 2020, the Company issued and alloted 7,672,500,000 ordinary shares of N1.00 each as Bonus issue from the share premium and retained earnings at the rate of 93 new ordinary shares for every 4 old shares held by the shareholders of the Company.

40 Foreign currency translation reserve

This comprises exchange differences resulting from the translation to Naira of the results and financial position of Group companies that have a functional currency other than Naira. Mutual Benefits Liberia Company Limited and Mutual Benefits Niger Republic SA have functional currencies other than Naira.

NOTES TO THE CONSOLIDATED AND SEPARATE FINANCIAL STATEMENTS - Continued

41 Contingency reserve

In compliance with Section 22(1) (b) of Insurance Act 2003, the contingency reserve for life insurance business is credited with an amount equal to 1% of gross premium or 10% of net profit (whichever is greater) and accumulated until it reached the amount of minimum paid up capital.

48 Related parties

Parent

Mutual Benefits Assurance Plc (incorporated in Nigeria) is the ultimate parent of the Group.

Subsidiaries

Transactions between Mutual Benefits Life Assurance Limited and its subsidiaries also meet the definition of related party transactions. Where such transactions are eliminated on consolidation, they are not disclosed in the consolidated financial statements.

Transactions with key management personnel

The Group's key management personnel, and persons connected with them are considered to be related parties for disclosure purposes. The definition of key management includes close members of family of key personnel and any entity over which key management exercise control. The key management personnel have been identified as the executive and non-executive directors of the Group. Close members of family are those family members who may be expected to influence, or be influenced by that individual in their dealings with Mutual Benefits Life Assurance Limited.

The volume of related party transactions, outstanding balances at the year end, and related expense and income for the year are as follows:

49 Contingent liabilities

Litigation and claims

The Company is presently involved in three litigations with estimated claims of N22,293,363 (2020: N22,183,424). The Directors believe that, based on currently available information and advice of counsel, none of the outcomes that result from such proceedings will have a material adverse effect on the financial position of the Group, either individually or in the aggregate.

ii Capital commitments

The Directors are of the opinion that all known liabilities and commitments which are relevant in assessing the Company's state of financial affairs have been taken into account in the preparation of these consolidated and separate financial statements.

50 Event after the reporting date

There were no events after the reporting date that requires disclosure or adjustment in the consolidated and separate financial statements that has not been disclosed or adjusted
